Fruit and Vegetables Value Chain & End Markets Report

December 2018

This value chain analysis and end markets report was carried out by an international expert team:

Jos Leeters (Bureau Leeters), in the position of international value chain consultant, is the lead, responsible for the core aspects of the value chain analysis and end market studies. He has conducted the work partly in Suriname, partly in the Netherlands and he has the final responsibility for this integrated report.

Stanley Oosthuizen, in the position of national value chain consultant, based in Suriname, is responsible for local data collection, identification of all relevant (private and public) stakeholders and connecting with them for inputs for the various elements of the value chain analyses in Suriname, with a special focus on the position of primary producers. He has done most of the coordination and reporting of the farmers survey.

Carolina Urrea Hernandez, in the position of junior international value chain consultant, based in the Netherlands, has contributed to the end market studies, mainly focusing on the desk research phase, particularly trade statistics analysis.

The study is meant for FAO internal use only.
The content is not available for public use.
